

3rd Leipzig International Meeting for
Interdisciplinary Obesity Research

December 11-13th, 2019

The eGMD brings the expertise together! Dedicated to the cross-cultural, interdisciplinary research on metabolic diseases, it will integrate various aspects of (epi)genetics, gene x environment interactions, functional genomics up to the potential translation of this knowledge in medicine. With an exclusive list of renowned speakers, we particularly approach and invite early and mid-career enthusiastic scientists to join us in a lively debate and exchange.
